

Introducing TurboTracker

The Smart Way to Manage Your Inventory

How we Can Help

- Tracks Stock: Levels, sizes, locations, and images
- Efficient tracking & updates for field professionals
- Admin interface for warehouse management & data export

“**Turbotracker is a great tool developed to save time and resources on the front end and back end of doing a client’s inventory of existing office furniture to be re-used in a reconfiguration.**

– **Robert Colson**
Design Studio Lead, Pivot Interiors.

Why TurboTracker?

- Easy furniture inventory management.
- Centralized platform for all warehouses.
- Ensures accuracy & reduces costly mistakes.

"Inventory mishaps cost the \$1.3 trillion retail sector as over 70% of retailers struggle with forecasting accuracy and supply chain tracking, spending more time identifying issues than solving them"

- Reported by ZDNet, you can find more details [here](#).

Challenges

- Errors in manual tracking.
- No real-time stock visibility.
- Complex multi-location management.
- Inconsistent data entries.
- Limited visual documentation.

TurboTracker Solutions

- Real-time inventory updates.
- Centralized warehouse management.
- Standardized data entry.
- Visual stock documentation.
- Flexible reporting tools.
