

# DESIGN AUTOMATION SERVICES

We help businesses automate design processes to reduce manual effort, improve accuracy, and accelerate project timelines.

Our solutions integrate with CAD platforms to streamline workflows and enhance efficiency.

- Automate repetitive design tasks and Workflows.
- Use AI and rule-based modeling for precision.
- Auto-generate permit-ready, NEC-compliant documents.
- Integrate automation with CAD for faster results.

## Industries We Serve

- ✓ Manufacturing
- ✓ Renewable Energy
- ✓ Material Handling
- ✓ Commercial Furniture

## Why Choose Riverstone?

- Automation Proven Track Record
- CAD & Engineering Software Expertise
- Tailored Custom Solutions
- Industry Versatility & Adaptability

# WHAT WE OFFER

## CAD Customization & Plugin Development

- Integrate CAD APIs for better workflow control.

## Engineering & Manufacturing Automation

- Automate site plans, layouts, and circuit diagrams.

## 2D & 3D Modeling Automation

- Generate 2D and 3D designs automatically with AI-powered accuracy.

## Circuit & Electrical Diagram Automation

- Auto-generate circuit diagrams, perform wiring calculations, and create compliance labels

## Data Exchange & Synchronization

- Convert and transfer data across CAD platforms while ensuring compatibility with PLM and ERP systems.
